***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 35 is rejected under 35 U.S.C. 102(b) as being anticipated by either of Statnikov'726 or Prokopenko et al. Each of Statnikov'726 or Prokopenko et al in their respective claims for example, teach a workpiece in which fatigue life is improved through the use of ultrasonic impact treatment, thereby showing all aspects of the above claim since in a product by process claim, such as instant claim 35, the process employed cannot be relied upon to lend patentability to the claim unless it can be shown that the process steps result in a materially different product.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berkley in view of Statnikov'726 or Prokopenko et al. Berkley teaches a method and final product in which the fatigue life of the product is improved through the steps of selection, or identification of a part to be treated, performance of a "pretreatment" in the form of non-destructive testing of the

Art Unit: 1742

type described by the instant dependant claims, performing a treatment that modifies residual stress to reduce fatigue, although no specific type of treatment is recited, and then performing a quality assurance test meeting the requirements of the instant claims, thereby showing all aspects of the above claims except the specific application of an ultrasonic impact treatment as the residual stress treatment step. Each of Statnikov'726 or Prokopenko et al teach that ultrasonic impact treatments were known in the art at the time the invention was made as desirable treatment for the modification of residual stresses to reduce fatigue. Because residual stress modification is the desired objective of the treatment required, but not specified by Berkley, motivation to employ ultrasonic impact treatments, as disclosed by both of Statnikov'726 or Prokopenko et al as known for the purpose of modifying residual stress in order to improve fatigue strength, as the treatment required by Berkley, would have been a modification obvious to one of ordinary skill in the art at the time the invention was made.

### ***Response to Arguments***

Applicant's arguments, see the response, filed on 2/23/2007, with respect to the rejection(s) of newly presented claim(s) 18-35 under 35 USC 102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of the Berkley, Statnikov'726 and Prokopenko et al references as applied above.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

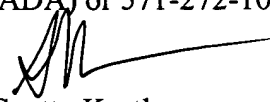

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
